FOR: OPTICAL ELEMENT AND

METHOD OF FABRICATION THEREOF

PRELIMINARY AMENDMENT

Assistant Commissioner for Patents Washington, D.C. 20231

SIR:

Please amend the above-identified application as follows:

SPECIFICATION:

Specification at page 4, line 13:

One aspect of the present invention is an optical element comprising: a substrate having or not having a channel for optical waveguide; and a material which has a refractive index higher than that of said substrate and is filled in said channel for optical waveguide or is disposed on said substrate; wherein

Specification at page 4, line 23:

Another aspect of the present invention is an optical element, the refractive index in a part of said material varies substantially periodically
